SHUTTERS

## Tru-Grain Custom Wood Shutters

**Tru-Grain** custom board and batten wood shutters offer a distinguished finishing touch that quality conscious customers require. The wood substrate used to make **Tru-Grain** shutters undergoes a unique manufacturing process to expose and pronounce the natural woodgrain texture on the shutter. This deep woodgrain texture is visible from the street and on 2nd story applications, your **Tru-Grain** shutters will not be mistaken for imitation plastic. Hand selected, kiln dried Cedar or pre-primed Pine is the preferred choice for this application. **Tru-Grain** custom wood shutters are available in a variety of standard sizes and styles, our shutters can also be custom made to fit any application need. We use only exterior grade fastening materials in all of our shutters, this combined with high quality wood substrate will add quality and style to any home.

### Design Styles

Cedar Board and Batten with cross brace

45 Degree Arch Top

Standard Pattern

Cross Board Placement
